## The O Booth

The sleek O Booth has a touch screen on the front and another on the back. Guests take their photo with an O-circle embedded light (hence the "O Booth"). This booth takes and prints single 4x6 shots, 4-in-1 collages with custom templates, GIFs, and more! The printer is located on the shelf attached to the booth for the cleanest most space-conscious setup. No secondary printer table or stand needed.

It is a great fit for the parties where waiting in line is not an option! Because this booth separates social media sharing and photo taking to TWO screens (front and back) guests are not waiting on line to take a photo while previous guests try to remember their Facebook password. Furthermore, the social sharing is simplified to the maximum: all we ask is a 10 digit photo number entry, which takes a few seconds, and the rest of the social sharing takes place on guests' phones! Our favorite simple and exciting photo booth!

Sleek, simple, elegant
